Purpose

In this document, fundamental tests were conducted on an Israeli website named Domino's Pizza, the largest pizza chain in Israel.

I took an online product and conducted a testing process on it that expresses my capabilities in the field, mainly on the subject of bugs and their documentation in the Jira system.

The purpose of these tests is to improve the performance, appearance of the site, and the customer experience.

The tests were performed on the main functions of the site such as:

- Ordering a pizza/meal for the private sector and also for companies (large order).
- Registering for the site.
- Using various features including accessibility features, displaying a variety of information, and more.

Application Overview

The "Domino's Pizza" website primarily serves as an internet site for displaying the menu for placing orders in the form of delivery or self-pickup.

It also contains extensive nutritional information regarding the pizzas and their preparation method.

Metrics

Test Cases Status

As you can see in the table, we conducted a total of 200 tests, most of which passed.

Pass	Failed	Not Run	Total
165	30	5	200

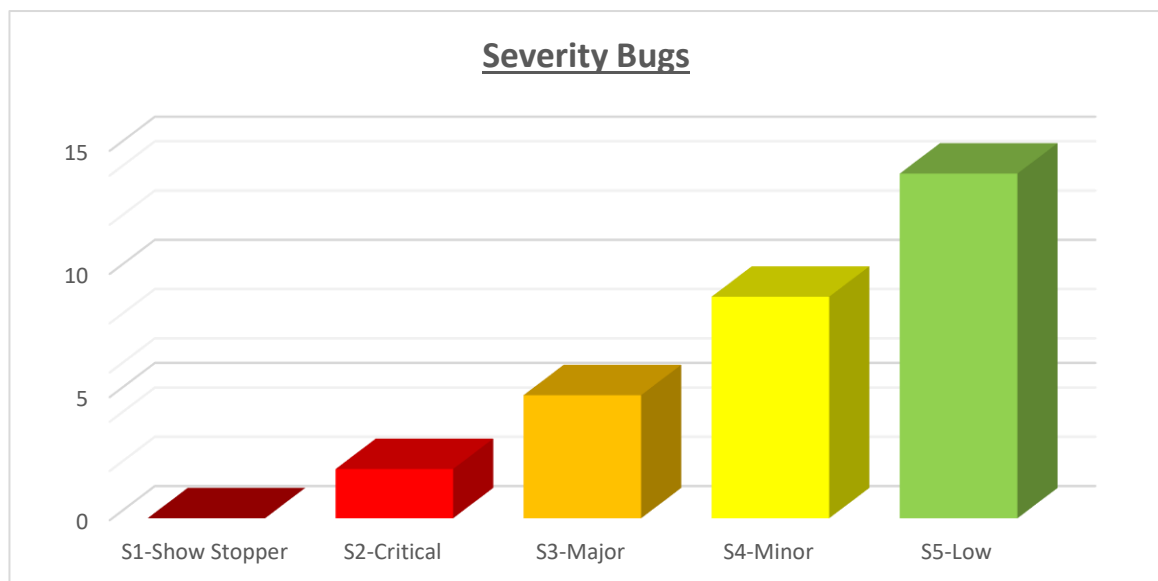

Severity Bugs Status

This bar chart represents the severity of the bugs I found on the Domino's website. It can be seen that most of the bugs are of low severity.

S1-Show Stopper	S2-Critical	S3-Major	S4-Minor	S5-Low	Total
0	2	5	9	14	30

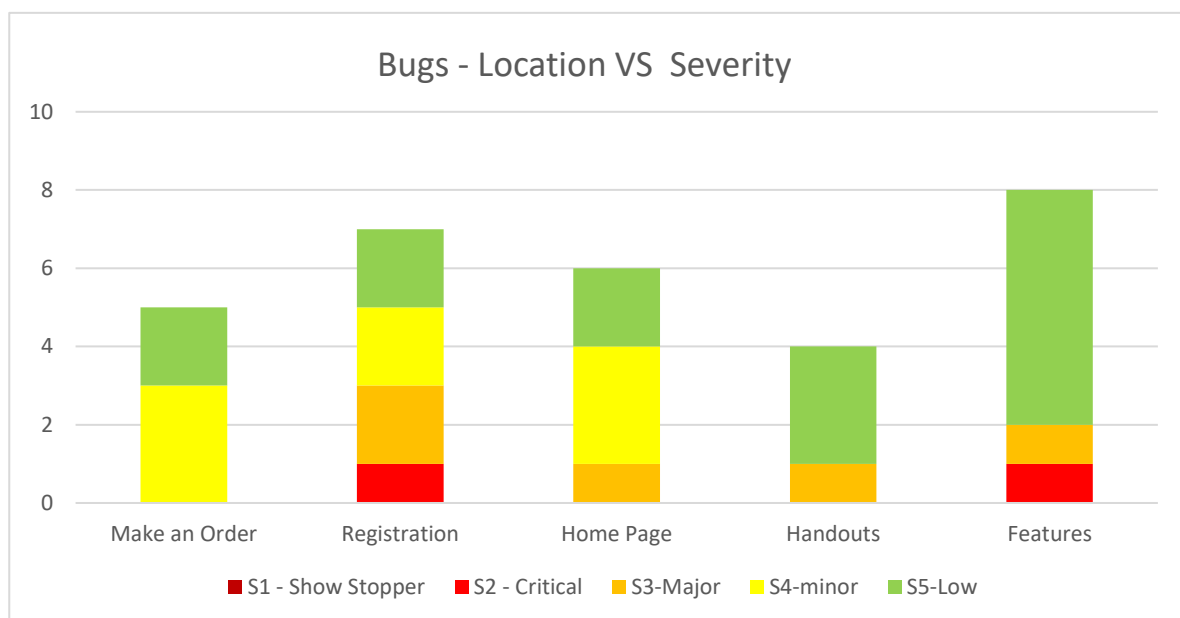

Defect Distribution - Module Wise

The following table shows the severity of the bugs according to the main locations on the Domino's site.

	S1 - Show Stopper	S2 - Critical	S3-Major	S4-minor	S5-Low
Make an Order	0	0	0	3	2
Registration	0	1	2	2	2
Home Page	0	0	1	3	2
Handouts	0	0	1	0	3
Features	0	1	1	0	6
Total	0	2	5	8	15

Recommendations

1. I recommend that the top menu appear on all pages and all the links to which I will go, so it will be easier and simpler to navigate between the different pages.
2. Another important thing is to improve the website's loading time.
3. The links that are not working, such as the Super Brands link at the bottom of the page or the LinkedIn link on the nutritional articles page, need to be fixed.
4. In general, the user experience is not good: fonts are not uniform from screen to screen, too many pop-up windows when I finish an order and go to the checkout, links do not open in a new page, etc.

Conclusion

After reviewing and checking the Domino's website, I realized that there are many bugs. Most of the bugs are of low severity (Low and Major).

Despite all that has been said, the site functions decently and can perform the important actions: viewing the menu, placing an order with a courier or for self-pickup, making a payment, and so on.

As a result, we recommend launching the website.

Bugs List

- DP-30 The email and phone fields on the user profile page are without a frame. Lack of uniformity.
- DP-29 The frame of the accessibility button on the website, located on the right side -is not straight.
- DP-28 on the birthday booking window, you don't have the option to choose the correct event.
- DP-27 There is no consistency in the location of the Domino's logo - it appears on a different side each time.
- DP-26 The link to the 'Young Chef Workshops' does not open in a new page.
- DP-25 The loading time of the site is too long.
- DP-24 There is no option to change to other languages besides Hebrew.internationalization test .
- DP-23 On the 'Pizza Composition' page, the pizza named MIX Carna, the picture does not show the toppings as required.
- DP-22 It is not possible to click on Domino's logo located on the right side of the 'Jobs' page because the accessibility button is too close to the logo.
- DP-21 On the branch page, within the list of branches in Tel Aviv, a branch in Ashkelon appears.
- DP-20 In the 'branches' page, on the branch list, it says 'Test Branch' which leads to a 404 error page.
- DP-19 The 'job' page does not open in a new window.
- DP-18 The LinkedIn sharing link at the bottom of the screen in the 'nutritional values' section-'Want to open a pizza dough'. is not working.
- DP-17 The font is dark and hard to see in the 'who we are' section, in the first paragraph.
- DP-16 A small window in the middle of the main screen of domino's, it's hiding and can't be moved.
- DP-15 In the 'nutritional values' web page the link 'Download the app' at the bottom of the page leads to the main page of Domino's instead of the app store.

- DP-14 In the 'nutritional values' page the link in the menu at the bottom of the screen 'Download the app' leads to the main page of Domino's instead of the app store.
- DP-13 In the nutritional values page, When scrolling up and down the page, the menu at the top of the page changes and is not stable.
- DP-12 In the help section, the page is too short, so when opening a number of questions, the next questions cannot be displayed.
- DP-11 Spelling mistake in the help section on the answer to the question 'How to order on the website?' PUZZALOVER.
- DP-10 The last date for the discount that appears on the main page has passed.
- DP-9 When displaying the details of the pizza branch in the branches section, the option to display the map is not working. Interface testing
- DP-8 In the help section, the question "Is there a gluten-free pizza?" does not appear, instead the answer appears directly.
- DP-7 When logging into the site with an incorrect email, it gives me a wrong 'message 'Incorrect password'.
- DP-6 Enables to submit job applications for children born in the years 2007 to 2008 (under 18 years old).
- DP-5 The font is different and hard to see in the privacy policy, section number 3.
- DP-4 The 'Super Brands' link at the bottom of the site is not working, it does not redirect to the link.
- DP-3 When logging into the site with an incorrect password, it gives me a wrong 'message 'Incorrect password'.
- DP-2 When logging into the site, I get a message 'You must check that you are not a robot', but there is no such option.
- DP-1 There is no indication that I have successfully registered for the site and no verification email has been sent.

Severity:

Low

Description

Steps to Reproduce

1. Open url <https://www.dominos.co.il/עזרה#>

2. Click on the second question, then scroll down and try to open the last question that's shown.

Actual Result

The page is short and cannot display multiple questions at once.

Expected Result

I expect that it will be possible to open multiple questions simultaneously and that they will be fully displayed.
